

# SAKETH REPAKA

## Software Developer

✉ saketh.repaka01@gmail.com ☎ +91 9381821847 📍 Hyderabad, India

🔗 sakethrepaka-portfolio.netlify.app/ 🌐 linkedin.com/in/repaka-saketh-99b277241/

### PROFILE

Results-driven Software Developer with expertise in building **scalable cross-platform applications** using **React.js, React Native, and Node.js**. Skilled in **backend development with Express and MongoDB**, secure authentication, and **API design**. Experienced in **state management (Redux, Context API)**, analytics integration, and A/B testing to optimize user engagement. Proficient in **AWS, SQL, Git**, and delivering high-quality solutions under tight deadlines

### EDUCATION

2018 – 2023  
Hyderabad

**B.E. (Hons.), Electronics & Instrumentation (Dual Degree)**  
*BITS-PILANI, Hyderabad*

### SKILLS

JavaScript | TypeScript | ReactJs | ReactNative | NodeJS | AWS | GIT | SQL | Express | MongoDB

### EXPERIENCE

12/2024 – Present  
Bengaluru, India

#### **Murf AI**

*Software Developer (JavaScript, TypeScript, React js, Node, AWS, Git)*

- Built a low-latency streaming **TTS audio player** using MediaSource API, consuming streaming APIs to enable real-time playback and showcase TTFB improvements.
- Implemented scalable **Redux-based** state management across Murf Studio for bulk project operations (**batch import/export, CRUD actions**) in collaboration with backend teams, supporting complex editor workflows and API-driven feature design.
- Integrated **Mixpanel and Google Analytics** event tracking into the Murf API website, enabling user journey monitoring and data-driven product decisions.
- Redesigned the Murf API product experience using event tracking insights (**Mixpanel, Google Analytics**), resulting in an 85% increase in key generation and 60% higher activation
- Led **A/B testing** for **pricing models** and **voice ranking systems**, improving conversion rates and feature adoption through iterative UI experimentation.
- Improved **accessibility** of Murf Studio using axe DevTools, **semantic HTML and ARIA practices** to enhance usability and compliance.
- Resolved critical production bugs and supported **enterprise onboarding flows** through integrated scheduling such as calendly integration and optimized user journeys.

12/2023 – 09/2024  
Hyderabad, India

#### **Brane**

*Software Developer (JavaScript, React js, ReactNative, Node, MongoDB, Git, Express)*

- Developed a scalable employee app for 2,000+ users through a consistent UI using reusable components and advanced state management with React Context API and Redux.
- Built a robust Node.js and Express backend with scalable RESTful APIs, implementing JWT for secure authentication.

- Enhanced application performance through thorough testing strategies, middlewares, and regular performance monitoring.

01/2023 – 07/2023  
Chennai

### **Barclays**

*Intern (JavaScript, React js)*

- Developed and maintained user interfaces for internal web application using React and ensuring intuitive stakeholder experience.
- Collaborated with cross-functional teams to integrate RESTful APIs, ensuring seamless data flow and efficient functionality within the application.

07/2022 – 12/2022  
Mumbai, India

### **Credit Suisse**

*Intern (Python, Numpy, Pandas)*

- Automated daily Excel tasks by migrating workflows to Python, leveraging libraries like pandas and numpy to streamline data analysis.
- Developed user-friendly scripts to perform data cleaning, manipulation, and reporting, significantly reducing manual errors and saving the team an average of

## PROJECTS

---

### **Food Delivery Application**

- Developed an food delivery application that use geosynchronus APIs for detecing location and firebase for authentication
- Designed responsive Cross Platform UI with tailwind and ensured consistent styling
- Enhanced user experience with real-time bot messaging using firebase

### **AI-Travel planner**

- Developed a Gemini AI-driven travel planner that generates personalized itineraries in a structured JSON Format.
- Implemented Authentication and storage via firebase and used ShadCn libraries for modern UI experience

### **Fitness Website**

- Developed a fitness website using React.js that lists various workouts with external APIs Intergration
- Leveraged MongoDB for efficient data storage and Express for middle ware and API integration

## KEY ACHIEVEMENTS

---

**Secured Below 1000 Rank in State engineering entrance examination**

**5 Times Recipient of Bits-Pilani Merit based Scholarship.**

## CERTIFICATIONS

---

**Advanced React**  
Meta

**Programming With JavaScript  
and NodeJs**  
Jovian

**AWS Cloud Essentials**  
Amazon
